PROFESSIONAL SUMMARY

Data Analyst candidate pursuing B.Tech in Computer Science & Engineering (Data Science) with a 9.63/10 CGPA. Hands-on experience across internships and projects using SQL, Python (Pandas, NumPy), Excel, and Power BI for data cleaning, exploratory data analysis, visualization, dashboard development, and reporting.

TECHNICAL SKILLS

SQL / MySQL: Joins, Aggregate Functions, GROUP BY, HAVING, DML, Database/Table Creation, Constraints

Python: Pandas, NumPy, DataFrames, CSV Handling, Data Cleaning, EDA, Missing Values, Duplicates, Basic Data Transformation

Visualization: Matplotlib, Seaborn, Plotly, Pandas Plotting

Power BI: Interactive Dashboards, Power Query, KPI Cards, Filters/Slicers, Basic DAX

Excel: PivotTables, VLOOKUP, XLOOKUP, Data Cleaning, Data Validation

Tools: MySQL Workbench, SQLite, Git, GitHub, VS Code

Soft Skills: Analytical Thinking, Problem Solving, Communication, Teamwork & Collaboration, Adaptability, Time Management

INTERNSHIPS

Data Analytics Intern — CodeAlpha

Aug 2026

- Cleaned and preprocessed datasets using Python to prepare structured, analysis-ready data.
- Completed three practical analytics tasks covering exploratory data analysis, data visualization, and sentiment analysis.
- Created visualizations and data-driven reports to communicate findings clearly.

Data Analytics Intern — Codec Technologies

Sep 2026 – Oct 2026

- Applied Python, Pandas, SQL, and visualization tools to assigned data analytics tasks.
- Performed data cleaning, transformation, and exploratory data analysis on project datasets.
- Completed an end-to-end data analytics project with exposure to industry-oriented workflows.

PROJECTS

DataVerse — Personal Data Analytics Portfolio

Technologies: HTML, CSS, JavaScript, GitHub Pages

- Developed and deployed a personal portfolio showcasing analytics projects, dashboards, SQL work, Python practice, and technical skills.
- Structured work into dedicated Analytics, SQL Lab, and Python Lab sections with direct access to project repositories and professional information.

Sales Performance Dashboard

Technologies: Power BI, Excel

- Cleaned and transformed raw multi-region sales data using Power Query before dashboard development.
- Built an interactive Power BI dashboard with KPI cards and trend charts to analyze sales, profit, and customer performance.
- Added filters, slicers, and monthly trend views to support exploration of profit and customer patterns over time.

At-Risk Student Detection and Performance Monitoring System

Technologies: Python, Machine Learning, HTML, CSS, SQLite

- Cleaned and validated academic records, handling missing values and formatting inconsistencies before modeling.
- Built a Python-based machine learning model to flag at-risk students using attendance, grades, and academic performance patterns.
- Designed faculty dashboards for attendance, grades, and risk indicators, backed by SQLite for on-demand reporting.
