PROFESSIONAL SUMMARY

Data Science undergraduate (CGPA 9.63/10) with hands-on experience in data analysis, data cleaning, and dashboard development — building a machine learning application and a Power BI dashboard from scratch, covering everything from data collection and validation to data visualization and stakeholder reporting. Comfortable working with Excel, SQL, Power BI, and Python, with a strong focus on data accuracy and quality throughout the analysis process.

EDUCATION

B.Tech in Computer Science & Engineering (Data Science)

2023 – 2027

ITM Vocational University, Vadodara, Gujarat | CGPA: 9.63 / 10

Senior Secondary (12th) — NIOS

2023

National Institute of Open Schooling | 55.5%

Secondary (10th) — GSEB

2021

Gujarat Secondary & Higher Secondary Education Board | 64.5%

TECHNICAL SKILLS

- SQL: SELECT, JOIN, GROUP BY, subqueries, aggregate functions (actively deepening)
- Microsoft Excel: VLOOKUP, XLOOKUP, PivotTables, data cleaning and validation
- Power BI: Interactive dashboards, Power Query, KPI cards, basic DAX
- Python: Pandas, NumPy fundamentals, predictive modeling workflows
- Git & GitHub: Version control, repository management

Currently upskilling in: Advanced SQL, Python for Data Analysis

INTERNSHIPS

Data Analytics Intern — CodeAlpha

Aug 2026

- Performed data cleaning and preprocessing on datasets using Python.
- Conducted exploratory data analysis (EDA) to identify patterns and insights.
- Created visualizations and generated data-driven reports.
- Strengthened analytical and problem-solving skills through practical assignments.

Data Analytics Intern — Codec Technologies

Sep 2026 – Oct 2026

- Worked with Python, Pandas, SQL, and data visualization tools to support analytics tasks.
- Performed data cleaning, transformation, and exploratory data analysis on assigned datasets.
- Studied machine learning fundamentals and applied them within analytics workflows.
- Completed a data analytics project, gaining exposure to industry-oriented practices.

SOFT SKILLS

- Analytical Thinking
- Problem Solving
- Communication
- Teamwork & Collaboration
- Time Management
- Adaptability

PROJECTS

At-Risk Student Detection and Performance Monitoring System

Technologies: Python, Machine Learning, HTML, CSS, SQLite

- Cleaned and validated an academic records dataset, handling missing values and formatting inconsistencies before modeling.
- Built a Python-based machine learning model that flags at-risk students early using attendance, grades, and academic performance patterns.
- Designed dashboards for faculty to visualize attendance, grades, and risk indicators without digging through raw records.
- Set up a SQLite backend to store and query student data for on-demand reporting.

GitHub: github.com/kuldeepy-hash/At-Risk-Student-Detection-System

Sales Performance Dashboard

Technologies: Power BI, Excel

- Cleaned and transformed raw multi-region sales data using Power Query, fixing inconsistencies before building visuals.
- Built an interactive Power BI dashboard with KPI cards, trend charts, and data visualizations for stakeholders to explore sales, profit, and customer performance.
- Added filters and monthly trend views so users could track profit and customer patterns over time without a new report each time.

CERTIFICATIONS

- Machine Learning Workshop — Data Science Certificate
- Advance Certification Course in Oracle APEX — ITM Vocational University (Dept. of CSE, FET)
- Advance Certification Course in Introduction to Python Programming — ITM Vocational University (Dept. of CSE, FET)
- Certificate of Participation — "Igniting Dreams of Entrepreneurship among Tomorrow's Entrepreneurs (IDEATE)", jointly organised by EDC, ITM Vocational University & Indian Society for Training and Development (Aug 2025)

ACHIEVEMENTS

- 3rd Position, Social Media Challenge — IES MCRC Hackathon
